

Comment Guide:

- For comments pertaining to functionality of a method / function, the comment block should be on top of when the function begins.
 - e.g. `//This function takes in a blah blah and does blah blah to it.`
`d3.function(...) {`
`.....`
`}`
- For comments clarifying a specific line of code, the comment should be either on top of the line or on the same line.
 - E.g. `print(...)` `//prints the blah blah of this data structure`

All Coding Standards:

Use google coding standard for HTML, JavaScript, and CSS.
