

## Definition of “Done” by Deer Squad

### Definition of Done (task)

- Code checked (**pushed**) into repository.
- Code peer reviewed by team members (answer the questions they ask)
- External/public API documented, and documentation (**comments**) within the code.
- Meets the requirements of that particular task (and is fully functional).

### Definition of Done (user story)

- all tasks for user story complete.
- tests performed and passed for all acceptance criteria.
- inspected and accepted by product owner.
- Meets the desired goal for the user story.
